## Workshops: Register to secure your spot, space is limited!

### Ultimate DC Motor Model Car Bootcamp!

*Two sessions (morning/afternoon). Maximum 10 participants per session. Sponsored by the WISH Center.*

Get ready for an electrifying adventure where creativity meets engineering! In this hands-on bootcamp, participants will dive into the exciting world of robotics by building their very own DC motor race car. Designed for speed and efficiency, participants will learn key skills such as testing for alignment and constructing a robust vehicle built to withstand impact.

Through an interactive racing team challenge, students will not only master the fundamentals of gears and gear ratios but also apply this knowledge in real-world scenarios. They'll gain practical experience with a variety of carpentry power tools, soldering equipment, and cutting-edge technology like laser cutting machines. Plus, they'll develop essential skills in using hot glue guns while testing for tensile strength.

Join us for a thrilling experience where innovation and teamwork collide, and unleash your inner engineer!

### "AI" Side Hustles: Master AI In One Day

*One session (morning). Maximum 25 participants. Bring your own laptop, if you don't have one, one will be provided for you to use for the class.*

*Hosted by School at Night.*

In this dynamic course, students will unlock the power of artificial intelligence to design unique, marketable digital products and deliver professional services. By leveraging a large language model, cutting-edge image generation, and intuitive design software, participants will gain hands-on experience creating low-cost, high-impact prototypes that appeal to today's buyers. From custom t-shirts and mugs to captivating 3D videos and mobile phone apps, students will not only design products that stand out but will also master proven marketing strategies to successfully promote and sell their creations independently.

### College Fund

*Financial aid workshop. One session (time TBD).*

This workshop will provide an in depth review of the financial aid process, including scholarships, grants, loans and work-study. It covers basic financial aid concepts, the Free Application for Federal Student Aid (FAFSA), and need analysis, as well as an overview of state and federal financial aid programs.
