

2nd Annual Parish Directory Update

It's time for our second annual Breeze (our secure directory database) update.

Questions? Contact Courtney:
courtney@allsaintschicago.org.

Please complete the UPDATE survey by Tuesday, September 10.

We want to know and serve you and your family better!

When we know more about our All Saints community, we can serve you better. In that spirit, we have added one field and updated another to learn more about our demographics, particularly race and age. To capture this updated info, we ask that you check your Breeze profile to make sure it is up to date. And we ask that you fill out the form (link below) whether you're new to the directory or already have info there.

Add a current photo of yourself, your family.

The form (link below) provides a place to upload individual and family pictures. If you are unable to locate a current photo or are having issues uploading photos, we will have photo stations available after church during September and we will upload photos for you.

Print version of the updated directory.

We will print a copy of the updated directory this fall. If you choose "yes" to being in the directory, you will also be able to access the online directory by creating a password-protected login. This will allow you to search for contact information (email, phone, address) for other persons in the directory and for them to search for you.

Please NOTE: *your info is not publicly available even if you choose to be in our directory and it is optional when you fill out the form. Your financial information or personal demographics are never visible to others and will not be printed.*

Help us make sure the larger church knows how vital we are!

We are (faithfully) proud of All Saints and we add our statistics, demographic data only, to a *Parochial Report* sent to the larger Episcopal Church. *The Parochial Report* provides important information for the use of parishes, dioceses, and the whole Episcopal Church.
