

**Assistive Technology (AT)** is any type of device or service that increases, maintains, or improves the functional capabilities of individuals with disabilities. In other words, *AT does more than make difficult tasks easier, it makes seemingly impossible tasks possible*. UCP's AT services increase the independence and enhance the lives of Pennsylvanians of all ages--at home, school, work, and even at play.

UCP's Changing Hands\* equipment reuse program provides restored and refurbished AT equipment to eligible individuals **free of charge**. A partial listing of the types of equipment and devices we have available on a regular basis includes, but is not limited to:

- walkers
- hoist lifts
- bath seats and toilet seats
- transfer benches and transfer boards
- manual and power wheelchairs
- scooters
- daily living aids (items for eating, dressing, etc.)
- canes and crutches
- adapted telephones
- communication devices
- assistive listening devices
- blind/low vision aids
- adaptive games and recreational devices

For a more comprehensive listing of items currently available, or to donate an item or items, please visit our website at: **[www.changinghandscentralpa.org](http://www.changinghandscentralpa.org)** To learn more about UCP's AT services, email: **[ATUCP@ucpcentralpa.org](mailto:ATUCP@ucpcentralpa.org)**

\*Changing Hands is supported in part by Pennsylvania's Initiative on Assistive Technology (PIAT). PIAT is the Commonwealth's Assistive Technology Act Program at the Institute on Disabilities, Temple University, and is funded through a grant from the Administration on Community Living, U.S. Department of Health and Human Services. The *Changing Hands* program is a participant in the Reused and Exchanged Equipment Partnership (REEP), a program of PIAT.
