EPIC is a global healthcare software company that helps people get well, helps people stay well, and helps future generations be healthier. Founded in a basement in 1979 with three half-time employees, Epic is today the leading electronic health record (EHR) developer in the United States and the most widely used EHR among the nation's hospitals and health systems. Epic supports healthcare organizations in 16 countries, with more than 3,700 hospitals using Epic and over 190 million patients managing their care online through Epic's MyChart patient portal. Epic is investing heavily in artificial intelligence across the clinical and administrative workflow while its Cosmos research network draws on more than 300 million de-identified patient records to help improve care.
