SMARTER SCANNING

FOR BIG & SMALL OPERATIONS

SAVE TIME & MONEY WITH EZ-REMOTE™

- *Tired of turning away cars and trucks because you don't have OEM tools?*
- *Uncomfortable with the highly technical calibrations that today's vehicles need?*
- *Spending $$$ for multiple tools but not seeing an adequate return on your investment?*

CAS
Connected Automotive Systems

Your Partner in Scan Tools

EZ-Remote software from CAS makes it easy to connect to a knowledgeable technician who can scan all of the cars and trucks that are not in your current tool by utilizing multiple OEM software applications.

If you are currently operating multiple locations within a region or across the country, setting up a scanning hub with EZ-Remote is an even more powerful way to start saving valuable time and money!

Visit www.OEMTools.com or call 1-877-263-4897 to learn more about EZ-Remote

HOW EZ-REMOTE WORKS

SCAN ANY VEHICLE THAT ROLLS INTO YOUR SERVICE CENTER

1. An on-site service technician uses their Zenith-5 or Gscan-3 scan tool to request a connection to an EZ-Remote operator.
2. The EZ-Remote operator connects to the on-site scan tool remotely through user-friendly prompts built into the software. Verbal communication is maintained through the tech's phone.
3. The EZ-Remote operator connects to the vehicle through the vehicle's data link connector (DLC).
4. After launching the appropriate OEM scan tool software the EZ-Remote operator can then perform a pre-scan to identify any pre-existing issues.
5. The technician can troubleshoot any service codes that show up and work with the EZ-Remote operator to launch necessary tests or perform calibration procedures.
6. Once repairs are completed, a post scan report can be generated to ensure any issues have been rectified and no new issues have been created.

Supporting Independent Repair Shops

Gain access to the most popular OEM scan tools on the market

Service more cars and shorten diagnostic times considerably

Full documentation with detailed pre and post scan reports

Reports can be emailed to the local shop for insurance purposes

Qualified support from CAS's team of vehicle experts

MULTI-OUTLET LOCATIONS CREATE A CENTRALIZED SCANNING HUB

TO SUPPORT MULTIPLE LOCATIONS IN YOUR ORGANIZATION

Access OEM tools for...

BMW
CHRYSLER
FORD
GM
HONDA / ACURA
MAZDA
MERCEDES BENZ
NISSAN / INFINITI
SUBARU
TOYOTA / LEXUS
VW / AUDI

More manufacturers slated to be added soon... contact us to learn more!

If you're managing multiple service centers across a particular region or across the entire country, adding EZ-Remote to your scanning routine can upgrade your operations significantly...

MANAGE DIAGNOSTICS FROM A CENTRAL LOCATION

Instead of communicating with CAS technicians, the host software can be installed on computers inside of your centralized service call center. Your techs are trained on how to use the software and handle requests that come in from the satellite repair locations.

INCREASE PRODUCTIVITY FROM YOUR TECHNICIANS

When a customer's vehicle arrives, technicians that may require assistance can quickly connect to the central hub with their Gscan-3 or Zenith-5 tool. Assistance can then be provided by more experienced techs at the centralized service call center.

REDUCE COSTS ASSOCIATED WITH MULTIPLE OEM TOOLS

Buying multiple copies of the same OEM tool is unnecessary with a centralized scanning hub. One copy can support multiple service locations within your network.

Whether you have one location or one hundred, CAS can help! Call 1-877-263-4897 today!

ARE YOU A MOBILE SCAN TECH?

Revolutionize your mobile automotive diagnostics business with EZ-Remote! When your customers own the Zenith-5 or Gscan-3 scan tools, you'll have the ability to connect to them remotely.

So rather than spending a large portion of your day driving from customer to customer, you can use today's technology to conduct your scans remotely, meaning faster response times, more efficient use of billable hours and higher customer satisfaction.

REDUCE YOUR TIME ON THE ROAD

Instead of wasting time driving all day, EZ-Remote allows you to connect to a customer's Zenith-5 or Gscan-3 tool to scan vehicles and troubleshoot any issues that are uncovered. This reduces non-billable time and maximizes your productivity.

EXPAND YOUR REACH TO MORE CUSTOMERS

Want to grow your business beyond your immediate area? EZ-Remote makes it easy to reach more customers, regardless of where their business is located. If they have the proper scan tool, you can connect and help to solve their issues.

BUILD YOUR OWN MOBILE DIAGNOSTIC EMPIRE

By using EZ-Remote software on your laptops, you'll have the ability to service as many facilities as you like and fortify your business to better compete with the larger national organizations!

We Understand Your Challenges

Servicing late model computerized vehicles is more of a challenge today than ever before for the aftermarket automotive service facility. Quite often the difference between being able to effectively and profitably service a car line depends on having access to 'Factory Level' tools and information.

We Understand Factory Tools

At CAS we are committed to bringing the 'Best in Class' Tools, Information and Reprogramming to the general aftermarket.

The EZ-Remote division reaffirms this commitment with sales and support staff who are well versed in OEM scan tool applications.

Have a question about the EZ-Remote software? Feel free to visit us online at **OEMTools.com** or call **(877) 263-4897** today!

Call 1-877-263-4897 to find out why mobile scan techs love EZ-Remote!
