Affordable So Everyone Can Be Trained

“After reviewing the content, this training was absolutely essential to the protection of my personnel and department. Mark has reasonably priced this training in order to get it to everyone. If you’re not training your staff on the dangers of social media, you are asking for litigation. Thanks for an excellent training program at a very affordable price. It is appreciated. I will recommend this course to others.”

Shawn Burns, West Texas A&M University, TX (2021)

“The course material was laid out in manageable portions. There was no fluff in the course, it contained useful material and was to the point.

Additional resources were offered, and the cost was reasonable especially given the alternative outcomes. Each student was given a link to the entire course, by email, for future review. Through this course our organization didn't become social media bullet proof, but we laid on some good armor to protect ourselves.”

Walter Armstrong, Natchez, MS

Employees Are Paying The Price For Lack Of Pro-Active Training

"Across our nation, there has been a total lack of leadership in pro-actively protecting public employees from the dangers of social media.

Too many public employees have paid the price for not receiving the tools to navigate social media safely. After auditing Mark Fiedelholz's Social Media Liability Course with our fire chief, we decided to mandate this training to every member of our teams. If you want to protect your people and your department, I strongly recommend this course."

Tim Barfield, Wellington, OH
