

This Attender Survey is a part of the Exploring the Pandemic Impact on Congregations (EPIC) project and Faith Communities Today (FACT) research initiative in which the United Church of Christ participates. Since 2000, FACT has conducted research that provides religious leaders of all traditions with critical information about the changing nature of congregational life and how to respond effectively. EPIC is a 5-year research project studying changes in the religious landscape since the COVID-19 pandemic.

Unlike previous studies from these projects which gather information from one representative of each congregation, this survey aims to capture the experiences of all the attenders within a congregation. This approach is not done often, making this survey a valuable opportunity to gain insights from attenders of religious communities across the country.
