

We are always learning and improving

Stollery Collaborative Practice Model– 2021

As of **February 17th**, the Stollery is adopting a shared model of care.

Your child will be cared for by a **Care Hub** – a team of nurses (Registered Nurses (RN), Licensed Practical Nurses (LPN), Healthcare Aides (HCA)) sharing their knowledge to provide the best care possible for a group of patients.

You can expect all members to know about and provide elements of care to your child.

Parents/caregivers are important members of the care team & your involvement and input helps us provide the best care.

You may notice groups meeting regularly throughout the day on the unit, often around a computer. These quick **huddles** allow the team to communicate changes, care needs and updates for all patients. Please share any changes or concerns to your nurses to share with the team. Your nurses will be available once the huddle is over.
