

Mentorship and Professional Development Committee Updates

Greetings for 2021! The Mentorship and Professional Development committee are working on a series of new initiatives for 2021 that we hope will be able to engage our members at all career stages. Stay tuned for some innovative community-based training events that will occur virtually over the next year!

If you are interested in helping out with any type of training/professional development events, please contact Iliia Karatsoreos (ikaratsoreos@umass.edu) to register your interest. We want to be as inclusive as possible, so members from all career stages, countries, and areas of research are encouraged to get involved. Your time commitment can be customized to fit any situation. A diverse community will be best served by a diverse committee membership.

For the first time ever, the UCSD Center for Circadian Biology Symposium will be held totally virtually February 9th to 11th. Open to all and with waived registration, this is a great opportunity to connect with cutting edge biological rhythms research. See: <https://ccb.ucsd.edu/activities-and-events/CCB%20Symposium.html> for more information!

We wish you a healthy and prosperous 2021!
