Tools and Tricks for Increasing Shop Revenue and Profitability with Epicor® MechanicNet™ Cloud CRM

Don't Give that Work to Your Competitors

You pull the car in. Lift it. Inspect it. Write it up. Look it up. Then you call the customer and get the response: “Nope, not today.” Not to all the work, but to some of it. These responses are usually the result of the work costing more than they planned or it might simply be they don't want to leave their vehicle with you overnight. But then what?

“Oh, they'll come back,” you assume. And most do. But **when**? How long do you want to wait? What about the ones that **don't** return?

If you aren't sending reminders to make sure these customers come back—and come back to **your** shop—that work could end up being done by your competitors. **You don't have to let the jobs slip away.**

Recommended Service Reminders in your Epicor® MechanicNet™ Cloud CRM solution use the data in your shop management software* to trigger emails and postcards to make sure that work comes back to your shop!

Remember, these are usually the bigger jobs, too, so use this valuable tool to make sure they don't get away!

* System dependent—call for details regarding your particular POS or shop management system.
