Experienced **CRANE OPERATOR**

Certification Training November 7–11, 2016

Northwest Iowa Community College in Sheldon, IA will be offering an Experienced Crane Operator Certification Training course, beginning November 7 thru 11, 2016. This 5-day course is for the swing cab operator who has past experience in the operation of the crane but needs to have the necessary training to become a certified crane operator based upon the National Commission for the Certification of Crane Operators (NCCCO) standards.

The participants will have a mixture of classroom prep for the NCCCO exams and hands-on practice in the hydraulic swing cab crane that will be used for the practical testing. Participants will be required to take two computer based exams (core and specialty exams) and successfully complete the practical testing. Upon completing the course and passing all necessary tests the students will be NCCCO certified. Students will also become qualified in Rigging/Signaling as part of the course.

The cost of the course is \$2,395 per person, plus \$215 for the cost of the required NCCCO core and specialty computer based exams, which can be taken here at NCC, and \$60 for the cost of the practical exam. Tuition assistance is available for those who qualify based on income guidelines.

For more information and details about the training (or other training options/dates), contact Scott Abbott in Continuing Education at 712032405061 ext. 104 or email sabbott@nwicc.edu
