

# Help your Child have a Successful MAP Experience

At ICS, we are dedicated to continuous improvement and meeting the learning needs of all of our students. One source we use to reflect on student learning strengths and identify areas for improvement is the results of standardized assessments. MAP Growth is an assessment utilized for measuring achievement and growth in K-12 Math, Reading, Language and Science. It provides teachers with accurate and actionable evidence to help target instruction for each student or groups of students regardless of how far above or below they are from their grade level.

## Help set your child up for success with these helpful hints!

### Be aware of the testing dates.

Your child's teacher will be communicating specific information with you.

### Be well rested.

Plan bedtime 30-60 minutes earlier than usual. Turn off the TV, video-games, and computers earlier in the evening.

### Eat a good breakfast.

Nutrition is important! As usual, students will be provided breakfast upon arrival at school.

### Be on time for school.

Students arriving late often feel rushed and anxious.

### Avoid scheduling appointments during testing dates.

Attendance during testing is very important. Be sure to avoid needing make-up testing by ensuring your child is at school on testing day.

### Have a positive attitude.

Our kids look at us to set the tone for the day. Smiles are contagious!
