BLUE TIGER INTERNATIONAL MANAGEMENT TEAM's assessment focuses on the needs our Client's project requires. We provide specific scrutiny in the following areas:

- **Evaluate current personnel deployment, skill sets and training requirements**
- Evaluate current Standard Operating Procedures in import/export, operations, logistics, compliance and regulatory adherence
- **Evaluate current set of business process standards in the global supply chain from both a logistics and compliance/security perspective, benchmarked against similar companies and global supply chain operations**
- Review of service providers and their compliance components
- **Review of transaction files for determining level of compliance**
- Internal communications assessment: Internet or other means
- **Opportunities for technology utilization in logistics, compliance, security and global supply chain efficiency**
- Country of origin issues, classification, and tariff shifts, etc.
- **Export license application process (if applicable)**
- Logistics improvements
- **Assist exposures and documentation review**
- FTZ and Bonded W/H Management Opportunities
- **Creation of procedures and best business practices (SOP's)**
- Duty drawback opportunities
- **Risk evaluation and Assess training needs**
- Vetting foreign visitor programs
- **HTSUS classification management assessments**
- Valuation verification assistance management assessment and review
- **Record retention procedures and shared information practices**
- Best Practices
- **Determine lines of accountability/responsibility for compliance**
- Current internal programs for training, education and skill set enhancement.
- **Review correct utilization of INCO Terms, revenue recognition, title and related areas**
- ISF compliance
- **CTPAT, deemed exports, ITAR/ECCN/EAR/USPPI Issues**
- Review marine cargo insurance risks and coverages
- **Foreign sourcing and foreign buyer programs**
- Other Government Agencies ... USDA, FDA, CDC, FCC, DOE, DOT, etc.
