National Background Investigations Bureau (NBIB) Launches Re-designed Electronic Questionnaires for Investigations Processing (e-QIP) (continued)

NBIB anticipates that this new format will improve the e-QIP experience for the applicant by allowing him/her to easily identify errors and understand how to address them before moving on.

Those familiar with e-QIP will notice visual changes to the login/registration process and the certification process. Individuals who have filled out their e-QIP questionnaire immediately prior to the launch will notice the change in design the next time they log into the e-QIP system.

** e-QIP is a web-based automated system that was designed to facilitate the processing of standard investigative forms used when conducting background investigations for federal security, suitability, fitness and credentialing purposes. E-QIP allows the user to electronically enter, update and transmit their personal investigative data over a secure internet connection to a requesting agency.*
