Handicapped Accessible

### Learning from Loons: linking animal, human & ecosystem health

Presented by Dr. Mark Pokras, Cummings Schools of Veterinary Medicine at Tufts University.

Photo by Kittie Wilson

The links between animal health, human health and the environment are undeniable. This talk will focus on how a long-term study of the loon is contributing to our knowledge of these links. We have learned a great deal about the basic biology of this long-lived species in the last few decades, as well as finding that it can also yield important insights on pollutants, emerging pathogens, climate change, and other threats.

THURSDAY, JULY 19 @ 7:00 P.M.  
ADMISSION FREE - DONATIONS APPRECIATED
