

AVERZION

AVERZION protects homes and commercial structures by creating a physical barrier that's too smooth and slick for pests such as scorpions to climb and keeps them in pesticide-treated areas for longer. This tile-like glaze dries clear, and will remain **effective for more than 10 years**. **AVERZION** dries to the touch in 2 hours and is fully cured in 72 hours making it quick, easy, and **a must-have** for anyone with pest-entry concerns.

AVERZION

AVERZION is a **physical barrier** application designed to protect your home or commercial building from pest entry. Using groundbreaking AVERZION technology, a **clear tile-like glaze** is applied to the stem wall of the structure's foundation. This smooth surface limits climbing ability and greatly reduces the number of access points available to pests.

Pitbull Pest Control offers **free AVERZION quotes**. Be aware, any landscaping, vegetation, or debris must be removed or moved away from the structure prior to the application date in order to properly apply the product otherwise, additional fees may apply. The AVERZION application service takes between 2 to 4 hours to complete depending on the size of your structure.

Pitbull Pest Control, **Nevada's largest fumigation company**, is here to protect your home and business. **Call us today at (702) 400-1946 to schedule your FREE estimate** or to inquire about additional services.
