Frequently Asked Questions →

- To see what CME ABFM has on file for you from the AAFP click on the tab which reads “Automatic Load from AAFP”. To see what CME you have manually submitted to the ABFM click on the tab which reads “Manually Entered”. From here click on the “Print CME History” button in order to print your CME transcript. Please note...you will only see CME listed here that has been completed and/or submitted within your current certification stage.

CME Tracking

A component of continuous certification requirement is related to participation in continuing medical education (CME). Since the inception of board certification, this has involved a requirement of an average of 50 CME credits annually. CME credit is earned by participating in Continuing Medical Education activities through ABFM, AAFP, AMA and other organizations. All ABFM-developed certification activities such as Knowledge Self-Assessment (KSA) Continuous Knowledge Self-Assessment (CKSA) and Performance Improvement (PI) will earn you CME credit.

Below is a record of all CME credits received by ABFM. You may print your CME record for this stage. This CME record reflects CME credits that have already entered into your Physician Portfolio.

While CME is a component required to maintain your ABFM board certification, ABFM is not a CME tracking agency. The CME reported through your ABFM Physician Portfolio is for our internal use to confirm that you have met the CME requirement for obtaining or maintaining certification.
