

[PROVIDING SOLUTIONS NO MATTER WHAT DIRECTION YOUR BUSINESS TAKES]

We're helping build a Clean Energy Economy...worldwide.

Producers of ethanol, biodiesel, renewable natural gas (RNG) and other cellulosic fuels count on EcoEngineers for in-depth expertise in auditing, renewable energy consulting and compliance management to help them optimize production and protect their investment.

For municipalities, industry and agriculture, we support RNG production projects and provide carbon management planning and nutrient reduction. In fact, we serve our clients in myriad ways. Our roster of services includes creating and managing detailed RFS, LCFS, and CFP programs and energy credit transactions. Wherever we're called to serve...

EcoEngineers is committed to Clean Energy, Clean Water, and Clean Air.

EcoEngineers offers a unique, comprehensive set of products and services designed exclusively for producers of low-carbon fuels or organizations focused on zero-carbon goals and sustainability initiatives for clean energy, clean water and clean air. Our core services are audit, compliance management and renewable energy consulting.

Audit

EcoEngineers offers a robust Quality Assurance Program, is an USEPA-approved auditor and Q-RIN verifier to the international biofuel community. Our QAP is the single most important work we perform. Along with a proprietary platform available to clients to help manage RIN compliance and reporting.

RFS and LCFS:

- Quality Assurance Program
- Third-Party Engineering Reviews
- Custom Audit Protocol Development
- Foreign Producer Monitoring
- LCFS Carbon Intensity Verification
- Q-RIN Program

Renewable Energy Consulting Services

EcoEngineers' consulting team is comprised of engineers, regulatory and compliance specialists, financial and life-cycle analyst – all of whom hold deep expertise in clean energy initiatives

Consulting Services

- Compliance Strategy
- RFS and LCFS Pathway Petitions
- RFS Efficient Producer Petition
- Regulatory Engagement and Advocacy
- Technology Assessment and Integration
- Emerging Technology Commercialization

- Market Analysis and Economic Impact
- Studies
- Kernel Fiber Now
- 3600 Biogas Solutions
- Sustainability Program Management:
 - CDP
 - RSB

Compliance Management

EcoEngineers' team of experts is dedicated to helping our clients protect their investment, make smart decisions, and optimize their performance through empowering programs.

Compliance Services:

- RIN Academy Workshops
- Customized Education and Training
- RIN Management & Compliance
- RIN Generation Protocol Guidance
- Compliance Management Plan Guidance

“EcoEngineers is by far and away the best recognized leader in RIN qualification, certification, RIN management and QAP programs-they set the standard by which everyone else is measured.”
