

**Attention: Repeat Presentation of the
Highly Successful**

Advance Healthcare Planning Project:

STMAA is again presenting an opportunity for you to learn about Advance HealthCare Planning through this vetted, successful project.

The goals of the project are for you to determine:

“What kind of and how much medical care do you want, that is right for you, if you have a serious illness?”

“Who knows what you want and can speak for you (honor and respect your wishes) if you cannot?”

We will be seeking ~16-18 adults, especially couples (spouses/partners/close family) to participate in a 2-part program. The first part will be work you complete at your home, the second will be a presentation and discussion at STMAA **Saturday December 7th from 9-10:30 AM.**

More details coming: If interested please contact
