RE: Epidemiology Service Contract

The Ministry of Health and Human Services is seeking interested and experienced Epidemiologists to submit proposal for the following essential services:

- Train staff to enhance skills on reporting and surveillance of communicable and non-communicable diseases.
- Assist in developing the national policy, the communication protocols (Standard Operating Protocols) and standard questionnaires for outbreak investigation, response and management, and other planning framework.
- Participates in the design, management, and monitoring of public health surveillance systems, including the Pacific syndromic surveillance system, hospital-based active surveillance, national notifiable disease, and disease-specific surveillance systems in the RMI MoHHS.
- Conducts routine assessments of the indicator-based surveillance systems, and supports their improvement and expansion in all Health Centers.
- Establishes the event-based surveillance system in the urban and rural health centers.
- Works with Health Information System (HIS) team to ensure that epidemiological data bases are populated as required, to enable analysis of health problems.

Duration: 1 year

For those interested party, please email rmimohreports@gmail.com to secure RFP document.

Deadline to submit project proposal is **October 31, 2019 by 5:00pm**. Proposals can be emailed to rmimohreports@gmail.com or hand delivered to MOHHS Administration Office.

For Further inquiry, please contact Edlen J. Anzures @ 692-455-3773.
