Public Health Infrastructure Center Overview

Mission

To improve public health outcomes by strengthening the public health infrastructure and workforce of the United States.

Public Health Infrastructure is made up of the ***people, services,*** *and* ***systems*** needed to promote and protect health in every U.S. community.

National Center for State, Tribal, Local, and Territorial Public Health Infrastructure and Workforce

Our Approach

Customer Service

The center advances new ways of serving jurisdictions and tribes to reduce administrative burden; strengthen peer-to-peer technical assistance; advance diversity, equity, inclusion, and accessibility; and further our shared public health missions.

Evaluation and Performance Management

Evaluation and assessment is baked into the center's work and programs, helping illuminate what works and how to continually improve CDC programs.

Partnerships

The center promotes results-based partnerships by leveraging partners to support jurisdictions, improving service to funded partners, and reducing barriers to partnering with CDC.

Working Across the Agency

Enterprise problems require enterprise solutions. The center collaborates across CDC programs to advance a cohesive, efficient strategy and approach to supporting jurisdictions, tribes, and partners.

Partnerships with States, Tribes, Localities, & Territories

CDC's Role:

- Help state and local health departments make the work they do stronger and more effective
- Get the resources and workforce states and localities need to build the health departments that will best serve their communities
- Deliver science, data, and info to health officials to implement effective programs and systems

CDC supports states by/with:

- Funding through grants and cooperative agreements
- Workforce development programs
- Field staff
- Information sharing
- Results-based partnerships
- Technical expertise

Strengthening U.S. Public Health Infrastructure, Workforce, and Data Systems Grant (FY23 and FY 24 investments)

107 jurisdictions received funding

- **50** States
- **22** Cities (incl. DC)
- **27** Counties
- **5** Territories
- **3** Freely Associated States

Workforce
Recruit, retain, support, and train the public health workforce

$3 Billion

Foundational Capabilities
Strengthen systems, processes, and policies

$385 Million

Data Modernization
Deploy scalable, flexible, and sustainable technologies

$625 Million
to 64 of 107 recipients

Budget period start:
December 1, 2022

Period of performance:
5 years/60 months

3 Partners funded with Component B:
Training, evaluation, and coordination support for grantees and data modernization totaling $340 million

Partners Funded:

astho™ PHAB

National Network of Public Health Institutes

Funding amounts shown are as of January 2024. Full funding details:

Workforce Development

The Public Health Infrastructure Center's Division of Workforce Development provides leadership for ***recruiting***, ***training***, ***developing***, ***and retaining*** the nation's public health workforce.

Prospective public health professionals:

Establish and advance fellowship, internship, and training opportunities that are both multidisciplinary and interdisciplinary.

Current public health professionals:

Offer and promote quality training opportunities from CDC, other federal agencies, and federally funded partners.

Health departments and public health partners:

Provide capacity building/technical assistance, support/lead efforts to build the evidence-base for public health workforce planning/development, collaborate with partners.

CDC programs:

Ensure efforts are coordinated and strategic agency-wide.

Our Approach

Working Across CDC and with Other Federal and Local Partners

DPS meets with partners across CDC and HHS to foster enhanced coordination and collaboration in the Pacific. These discussions focus on shared priorities, new initiatives, opportunities for collaboration, and how to best coordinate federal partnerships to support the USAPI.

Funding Projects in the Region

In FY23, CDC awarded $6,559,989 to support PIHOA with 18 projects in the USAPI. These projects are working to support infrastructure and workforce needs in the region.

Building Capacity

DPS meets regularly with health officials and staff in the USAPI to discuss priorities, provide technical assistance, and problem solve around common issues in their work.

Current Work in the USAPI

The Division of Partnership Support leverages ***public health partnerships*** to help develop the capacity of state, local, tribal, and territorial public health systems.

Workforce Enumeration Study

Conducted to better understand infrastructure and workforce needs in the USAPI.

Pacific Public Health Fellowship Program

Creates a sustained pipeline of skilled public health professionals in the USAPI.

CDC Public Health Emergency Preparedness and Response

Michelle McConnell, MD

East Asia and Pacific Regional Director

U.S. Centers for Disease Control and Prevention

Global Health Security

The ability to prevent, detect, and effectively respond to infectious disease outbreaks and other public health threats.

Diseases spread farther and faster

2 out of 3 countries are not prepared for a major outbreak

Major outbreaks demonstrate costs to human health, economies, and quality of life

CDC's Global Work Driven By Domestic Mandate

In today's tightly connected world **a disease can be transported** from a remote village to major cities on all continents **in as little as 36 hours.**

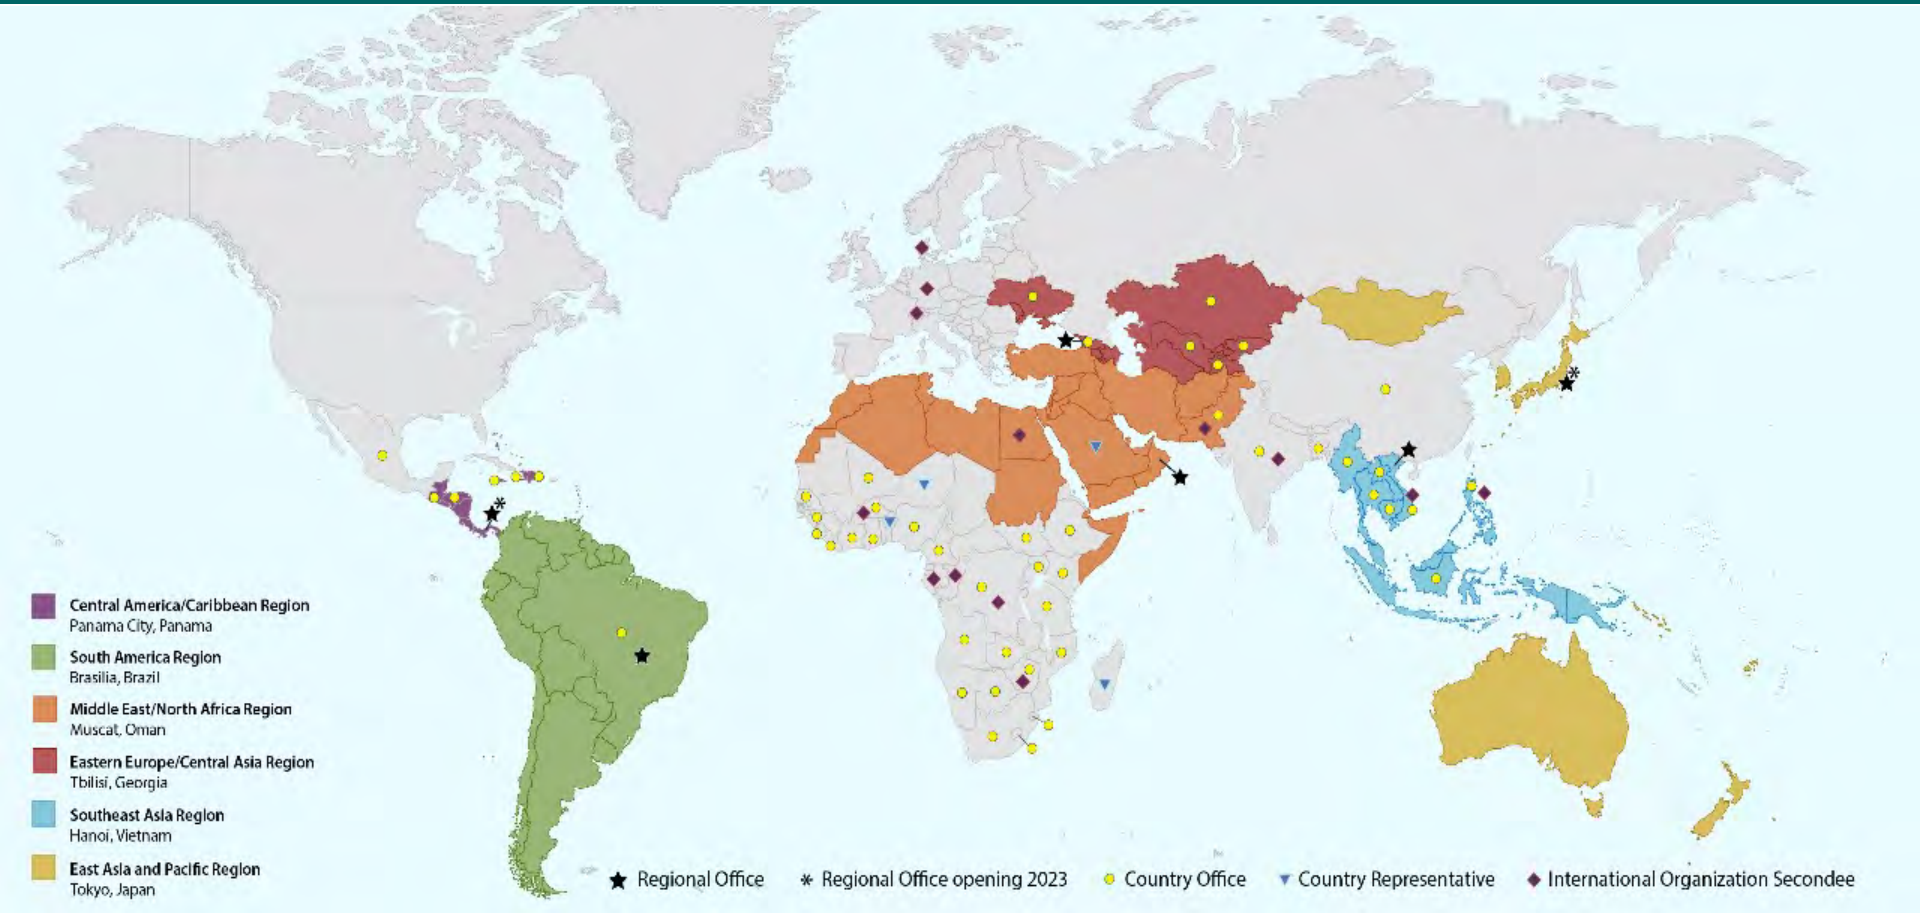

CDC Global Health Vision and Mission

VISION: A safer nation through prevention, detection, and response to disease threats, anytime and anywhere.

MISSION: To maximize global health impact, CDC will:

1. Identify, respond, and mitigate health threats in international settings
2. Build on strong government and non-government partnerships
3. Build and sustain capacities for surveillance, diagnostics, and workforce
4. Deploy a diverse public health workforce and share expertise to advance health and translate science into practice
5. Bridge US preparedness and strong global capacity to prevent emerging threats

CDC Global Presence – Country & Regional

CDC Regional Offices

Strengthen CDC's international presence in regions that historically have a lighter CDC footprint

Collaborate at a regional level by engaging with regional entities and taking advantage of regional assets

Coordinate CDC global strategy, and activities across countries and across CDC programs

Sustain a long-term international presence that is prepared to rapidly respond to wide-ranging disease threats around the globe

CDC East Asia and Pacific Regional Office

CDC East Asia Pacific Regional Office: objectives and key areas of focus

Working together, U.S. CDC and partners will:

Strengthen collaboration and partnerships with partner governments, international organizations, academia, and other public and private partners to improve regional and global health security.

Improve detection and rapid response to emerging threats and diseases of public health importance.

Improve knowledge and information exchange between U.S. CDC and the region on effective public health practices and public health threats.

U.S. CDC's Global Health Strategic Framework

CDC Global Health Center

Six core pillars encompass U.S. CDC's global health activities:

PILLARS — GOALS

Data & Surveillance

Integrated surveillance and data systems that detect, identify, and monitor disease threats and produce high quality, timely data that are available and effectively utilized for public health decision making

Laboratory

Public health laboratory network sufficient to prepare for, detect and respond to priority health threats

Workforce & Public Health Systems

Coordinated and sustainable essential public health functions and multisectoral public health workforce effectively utilized for public health decision making

Prevention & Response

Capability to implement interventions that control and prevent the spread and impact of health threats

Public Health Innovation & Research

Capability and commitment to conduct research, implementation science, and public health evaluations in response to public health threats and to address knowledge gaps

Health Policy, Communication, & Diplomacy

Ability to develop and rapidly disseminate evidence-based policies and communications in response to prioritized health threats and engage diplomatically with global partners

Partnerships in the East Asia and Pacific region

- Host governments including MoHs
- Other development partners
  - JICA (Japan)
  - KOICA (Korea)
  - DFAT (Australia)
  - BMGF
  - Gavi
- Regional bodies
  - ASEAN
  - APEC
  - Pacific Community (SPC)
  - Pacific Islands Forum
  - Quad
- UN agencies
  - WHO WPRO regional office
  - FAO, WOAH
  - UNICEF
- USG
  - HHS
  - Department of State
  - USAID
  - Department of Defense/INDOPACOM
- Financing
  - World Bank
  - ADB
- Private sector

Pacific Public Health Surveillance Network

PPHSN includes six services to prevent and respond to epidemics:

PacNet

for alert and communication

LabNet

for verification and identification

EpiNet

for preparedness and response

PICNet

for infection control

Syndromic surveillance

Pacific Syndromic Surveillance System, for outbreak detection

SHIP (DDM)

for capacity building
