Robert Haigh, Product & Facilities Specialist

New Technologies in Production Switchers & PTZs *(Is Single-Cable Operations in Your Near Future?)*

Imagine your camera connected to your switcher (permanent or portable) via a single CAT6 cable, providing power, HD video, PTZ control, tally and even audio. Imagine no more. NDI & HDBaseT systems are being installed (or hand carried) to events and studios throughout New England. Reduce your workflow, your costs and your headaches. This seminar will compare and contrast three current production switchers on the market: NewTek TriCaster TC1; Data-Video HS-1600T and the Panasonic AV-HLC100P and the PTZ cameras that work with them. CG, record, streaming, built-in audio & clip play capabilities will be reviewed. And be sure to stop by the Access A/V booth for hands-on demonstrations of these switchers.

Now in his 10th year at Access A/V, Robert Haigh, Product & Facilities Specialist has been designing, demonstrating & training new technologies to the region's government, educational & community media centers. Prior to this position he served as Executive Director of WCAT (Wakefield-16 yrs) and LTC (Lowell- 5 yrs) and also worked for a time at Broadcast Pix. He makes his home in Chelmsford, MA.

About Access A/V

Access A/V is a leading authorized dealer, integrator, training center and repair site, serving New England from our offices & showroom in Concord, NH. We offer a comprehensive lineup of professional cameras, lighting, audio products, projection & displays, and production accessories at competitive pricing. On-site (or online) product demonstrations, a loaner program and detailed product training are an important part of our core mission.

This product showcase is being offered at 11:30 am as part of the Media Resource Expo 2019.
