

# Ancillary Corner

You may have noticed that ancillary looks a little different. Here are the changes we have implemented this school year.

- Each ancillary teacher stays with the same class for an entire week.
- The counselor has joined the ancillary rotation for 1st and 5th grade students.
  - Counselor ancillary goes over Social/Emotional Learning and topics of the month. For example, October was National Bullying Prevention month and lessons included anti-bullying activities.
- Computer Lab 2 is now a Spanish class.
  - ¡Saludos amigos de West U! The best way to learn a new language is to use it. For Spanish Lab, Mr. C is posting links with songs and activities in Teams and on the HUB for students to practice at home. Also a big thank you to WUES PTO for purchasing curriculum and materials to improve the Spanish Lab.
- Computer Lab 1 is now Listening Lab.
  - During the first rotation, K-2 students will learn about interesting topics from the audio program, *But Why? A Podcast for Curious Kids*. Activities will sharpen students' listening skills, whet their curiosity and stretch their imagination. In grades 3-5, students will be introduced to the art of debate. By listening to the podcast, *Smash Boom Best*, they will learn how to build strong arguments, spot weak ones and defend their own opinions. I look forward to guiding students as they explore the learning potential of podcasts!
- Four homerooms go to PE each week.
- We still have art, library and science lab classes.
