Brain Wellness Briefing

Session 4: The New Era of Alzheimer's Research

How close are researchers to finding medications that have a significant impact on Alzheimer's disease (AD)? Is it possible to significantly reduce one's risk?

Join Seth Gale, MD, on December 4th to hear about some updates on the latest breakthroughs in Alzheimer's science!!

Dr. Gale will discuss:

- Emerging updates on clinical trials for AD, focusing on trials at BWH
- Research studies aimed at AD prevention
- A review of brain health behaviors and lifestyle that reduce your risk for developing dementia

Dr. Gale is a neurologist at Mass General Brigham, and an Assistant Professor of Medicine at Harvard Medical School.

Session 4

Friday, December 4th
12– 1 pm EST
