

STAR TRACK – OCTOBER 2020

BY RAMDAS BILL SINCLAIR

Hello Jyotishis,

October starts and ends with a Full Moon in Pisces and Aries respectively. The new Moon is on 16 October at 29 Virgo the same day that Sun will enter Libra, his debilitated sign.

As for Retrogrades, which have been a major theme in 2020. Mars remains retrograde throughout the month and moves back into Pisces on 3 October. Mercury starts his final retrograde on 13 October and stations direct on 3 November, the date of the US Elections. I am including a transit graphic so you can easily see the trends on a given date as well a list of key transits to watch.

	October 2020
