Re: CAMC Cancer Center | Breast Cancer Survivorship TeleECHO Clinic

We're writing to you to invite your participation in an exciting project that will help you build expertise in the evaluation and management of your breast cancer patients.

CAMC Cancer Center, CAMC Institute, and Project ECHO (Extension for Community Health Care Outcomes) is launching the "Breast Cancer Survivorship TeleECHO Clinic".

The ongoing TeleECHO clinics will consist of hour-long sessions starting at noon (12:00pm). The clinic begins with a 20-minute lecture on a specific topic relevant to primary care. As with all TeleECHO clinics, **CME for health professionals is offered at no cost.**

Following the short lecture, participants can present de-identified cases (submitted in advance) which serve as the focal point for in-depth discussions related to clinical care for breast cancer.

The next TeleECHO clinic will occur on Tuesday April 24th 2018 at noon (12:00pm).

We hope to collaborate on other topics of interest. If you have suggestions for topics or cases, please share them with us. Please learn more about Project ECHO via the webpage at echo.unm.edu or contact our project coordinator directly at josh.kent@camc.org so we can set up a time to discuss. We look forward to your involvement in our Breast Cancer Survivorship ECHO clinic.

Sincerely,

A handwritten signature in black ink that reads 'Steven Jubelirer, MD'.

Steven Jubelirer, MD
