

Protecting Our Students: Revisiting Suicide Prevention, Mental Health and Gun Safety

FREE

WEBINAR!

May 23, 2018 | 12:00 - 1:00 PM | Via WebEx

Health care providers face many challenges when working with patients who are at risk for suicide. Some patients may not disclose thoughts of suicide, and even if they do, the health care provider must make judgment calls about possible future behavior, often with insufficient or contradictory information.

Please join us for a webinar with Barri Faucett, Director of Prevent Suicide WV, known for her expertise on this subject. This hour-long interactive learning opportunity will address suicide prevention along with how poor mental health increases the risk and the role of gun safety. SBHCs are a critical venue for assessing not only a child's physical health, but their emotional health as well.

During this webinar, participants will:

- ✓ Review risk and protective factors associated with suicide.
- ✓ Be introduced to components of suicide inquiry and elements of safety planning including incorporating of means safety.
- ✓ Learn about specific resources and programs for suicide prevention and intervention efforts

Target Audience:

School-Based Health Center Staff and Behavioral Health Staff

Registration Form

Please complete the below registration form for all participants from your organization. Webinar information will be sent to the individual identified as the main contact for each organization.
