

**When I was thirsty,
you gave me something to drink...**

Water for drinking, cooking, bathing
and cleaning is a basic human need
and right.

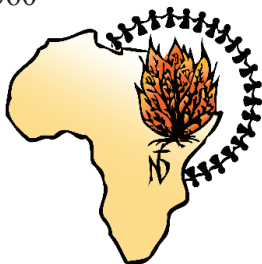

Give the gift of life-giving water to

- 650 students & staff at St. Julie's Mission
- 350 students at neighboring schools
- 1,000 villagers
- 20,000 parishioners

Help us raise \$100,000 to improve the lives of 22,000 individuals.

For St. Julie's Mission and the village of Buseesa, the availability of water is a regular challenge. Water sources have been a local spring and captured rain water. Storage tanks have limited capacity and durability. In this drought-stricken area, a pump water system is the only sustainable way to meet hydration and sanitation needs.

This new durable system, designed by a local company, will use a borehole deep well and a distribution structure--a pump house, gravity tank and stand, lower tanks, piping and taps. An additional tap at the parish will allow community access to safe drinking water. St. Julie Mission is uniquely positioned to oversee the funding, construction, maintenance and security of this project.

Your help will make a big difference.
Thank you and God bless you!
