## Design Data

## Comments

This design was written specifically to make use of 7-fold symmetry to help brighten up dark iron-bearing garnets. It does require an 84-index, which can be hard to find, but it's well worth it. The light output is impressive, and P3 can be omitted for smaller stones. Looks inordinately, unreasonably beautiful in white rutile or moissanite. Works in materials from tourmaline to rutile (RI = 1.62 - 2.62) with no changes.
