

Needle felting cactus

What is needle felting?

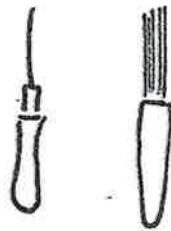

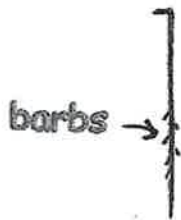

When a barbed needle is pushed through raw wool, the barbs catch and pull the fibres so they tangle and bind to form a matted fabric.

felting needle

needle holder

felting pad

1. Place some cotton in clay pot.
2. Cover cotton with brown wool and poke with needle till firm.
3. Roll green wool into a ball.
4. Place ball on felting pad and poke with needle so fibres interlock.
5. Place green ball on brown wool and poke to station it.
6. Place thin strips of dark green wool vertically on green ball and poke into place.
7. Poke a small piece of colour wool into a flower and place it on top of cactus.
