Mental Health Liaison Group

September 22, 2017

The Honorable Orrin Hatch
Chairman, Senate Finance Committee
United States Senate
Washington, DC 20510

The Honorable Ron Wyden
Ranking Member, Senate Finance Committee
United States Senate
Washington, DC 20510

Dear Chairman Hatch and Ranking Member Wyden:

On behalf of the Mental Health Liaison Group (MHLG), the undersigned organizations are writing today to express our strong opposition to a new Graham-Cassidy-Heller-Johnson (GCHJ) proposal aimed at repealing and replacing major portions of our current health care system. The GCHJ proposal fails to protect the health care coverage and consumer protections available under current law, particularly for individuals with substance use disorders and mental illness. Additionally, it would create a health care system built on state-by-state variability that would exacerbate inequities in coverage and most likely place millions of vulnerable individuals at risk of losing their health care coverage.

MHLG is a coalition of national organizations representing mental health and substance use disorder (MH/SUD) consumers, providers, family members, payers, and other MH/SUD stakeholders. Together, on behalf of the millions of Americans living with MH/SUD, their families, and communities, we advocate for public policies and funding to improve access to high-quality care.

We recognize that the GCHJ proposal would require coverage of mental health and substance use disorder treatment consistent with Health Parity and Addiction Equity Act (MHPAEA) as part of the new Medicaid Flexibility Program. However, we do not support many of the other changes to the health care system in the proposal that would result in reduced access to substance use disorder and mental health treatment, including changes that would cap federal funding for Medicaid, end the Medicaid expansion, and eliminate mental health and substance use disorder benefit protections for Americans insured through the small group and individual markets. We have serious concerns with provisions in the proposal that would allow states to easily waive Essential Health Benefit requirements, end Medicaid expansion and change Medicaid to a per-capita or block grant financing system.

The ACA's Medicaid expansion, Essential Health Benefit requirements for mental health and substance use disorder treatment coverage, and extension of parity protections to the individual and small group market have surely reduced the burden of the opioid misuse and overdose and suicide epidemics and saved lives. Substance use disorder and mental health treatment benefits must continue to be available to Americans enrolled in the individual, small and large group markets as well as Medicaid plans and that these benefits are compliant with the Mental Health Parity and Addiction Equity Act.

Further, we are very concerned about rushing through any legislation to repeal and replace the ACA, including the GCHJ proposal, through the current budget reconciliation authorization, which is set to expire on October 1. Instead, we call on the United States Senate to set aside the GCHJ

National organizations representing consumers, family members, advocates, professionals and providers

proposal and turn its focus to bipartisan efforts to stabilize the health insurance marketplaces, create competition among insurers, and lower the costs of health care.

While we are unable to support the GCHJ proposal, we stand ready to work with you and the full Senate to secure passage of legislation that would build upon the successes we have made in extending health care coverage to millions of previously uninsured individuals.

Sincerely,
