

Hogadon Night Skiing Project(continued)

There are two main goals for the Hogadon Night Skiing Project, over the next year. First, to raise the necessary funding for Phase II of the Project, in order to bring outdoor recreational sports lighting to Dreadnaught, the main ski run at Hogadon, along with a connecting ski run called Dickies Delight. With the completion of the fund raising for Phase II of the Project, the goal is to have all the necessary materials for the infrastructure ordered, delivered and installed for the start of the 2023-2024 ski season. This is a big goal, but someone once said, "if it doesn't scare you, it's not big enough!" The second goal for the Hogadon Night Skiing Project, over the next year, would be to deliver an awesome experience for people coming out for night skiing at Hogadon Ski Area! This goal requires partnering with the City of Casper to help promote and encourage people of all ages to come out to Hogadon for night skiing, that when they arrive, they find a beautifully lighted ski hill, with well marked and maintained ski trails, and in superior condition! Our goal is to continue to deliver a truly awesome outdoor recreational experience for the entire family!

If you would like to get involved with this project, please reach out to John Lutz, the president of the Hogadon Night Skiing Project, by phone or email, and he would be very glad to visit with you anytime! (email: johnlutz@awminc.biz; phone/ text 307-797-2016) or visit their website.
