

Chicago COVID-19 Reopening Risk Matrix - Phase IV

The image displays a risk matrix for Chicago's COVID-19 reopening in Phase IV. It features a table with six columns representing risk levels: Very high risk, High risk, Moderate risk, Lower risk, and Controlled transmission. The rows represent different metrics: COVID-19 cases diagnosed per day, COVID-19 test positivity, Emergency department visits for COVID-19 like illness, ICU beds occupied by COVID patients, and Additional considerations within each risk level. Each cell in the table contains a range of values and, where applicable, a current value in red text. A red star icon is positioned to the left of the table.

	Very high risk	High risk	Moderate risk	Lower risk	Controlled transmission
 COVID-19 cases diagnosed per day <small>Chicago residents 7-day rolling daily average</small>	800+	400 – 799	200 – 399 <i>current: 283</i>	20 – 199	<20
COVID-19 test positivity <small>Chicago residents 7-day rolling daily average</small>	10%+	6.6 - 9.9%	5.0 - 6.5%	2 - 4.9% <i>current: 2.9%</i>	<2%
Emergency department visits for COVID-19 like illness <small>Chicago hospitals 7-day rolling daily average</small>	90+	80-89	60 - 79	20 - 59 <i>current: 42</i>	<20
ICU beds occupied by COVID patients <small>Chicago hospitals 7-day rolling daily average</small>	400+	300 - 399	100 – 299 <i>current: 103</i>	20 - 99	<20
<i>Additional considerations within each risk level</i>	<i>Metric will revert to very high risk if 7+ consecutive days ≥15% higher than the week prior -or- ICU capacity is <20%</i>	<i>Metric will revert to high risk if 5+ consecutive days ≥10% higher than the week prior -or- ICU capacity is <22%</i>	<i>Metrics must continue to decrease or remain stable relative to the week prior</i>	<i>Metrics must continue to decrease or remain stable relative to the week prior</i>	<i>Metrics must continue to decrease or remain stable relative to the week prior</i>
