

CNPS Field Trip to Jackson Demonstration State Forest

Join JDSF Forester, Lynn Webb, for an approx. 4 mile loop through Bob Woods Meadow. Bob Woods Meadow is one of the few natural meadows in the redwoods. It is a grassland that lies below a mineral spring and has not been grazed by livestock for at least 75 years!

Lone Death Camas

Douglas Irises

After consolidating vehicles at Camp One, we will drive approx. 3 miles to the trailhead. There is a small creek crossing (4" of water) and a $\frac{3}{4}$ mile hike to the meadow, as well as the chance to explore the prescribed fire research site beyond.

Please bring *water*, *weather appropriate clothing*, and *lunch*. We will eat at Camp One or on the trail.
