

## Enhancements to your natural gas system in La Grange Park

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractor KS Energy, has been working to modernize the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of our work.

### Our Progress

KS Energy has completed the installation of a new natural gas main in your neighborhood. Now that the new natural gas main has been installed, we will be working to install new natural gas service lines which will connect each customer's property to the natural gas main. Once the new natural gas service lines have been installed and all impacted customers have been connected to the new system, we will begin to retire the old system.

### Completing Our Work

As we install the new natural gas service lines, Nicor Gas, with its contractor KS Energy, will be performing a limited number of excavations in the neighborhood to access specific segments of natural gas main as needed. For most properties, KS Energy will make one small excavation in the parkway near the natural gas main and one small excavation near the new location of the natural gas meter. Once your service line has been installed, it will be temporarily locked off until your property is ready to be connected to the new natural gas main. Nicor Gas or our contractor KS Energy will contact you to schedule an appointment to connect your property to the new natural gas service line and main. During this time, we will also move your natural gas meter outside and reconfigure your inside piping. Your natural gas service will remain off for approximately three hours. If there is more than one meter, this process may take longer.

### Restore Landscaping & Paving

We understand that you value the appearance of your property. Nicor Gas, or one of its contractors, will restore landscaping and paving impacted by our construction to the condition in which we found it. **Temporary restoration of some areas may be necessary until permanent restoration can be completed.**
