

Environmental Action Team

Mission Statement

Working to make God's love and justice real in our world.....

Guided by the values of the Presbyterian-United Church of Christ (PUCC) in Saratoga Springs, NY, our Environmental Action Team (EAT) strives to build on those values by:

Making socially responsible decisions through caring for the earth and protecting the environment.

The EAT has taken and will continue to take concrete actions to:

Reduce our use of fossil fuels to mitigate climate change;

Uphold universal human rights and stand up for environmental justice;

Engage our congregants through educational awareness of key environmental issues;

Provide specific examples of how each of us can decrease our ecological and carbon footprint to make a difference.

We strive to build on these actions to become a more ethical and socially responsible church community.
