

## Webinar Series

# Charting the Life Course: An Interdisciplinary Blueprint

**Webinar 1**  
June 18, 2020

An Introduction to Life Course Research and Complexity Science.

**Webinar 2**  
July 16, 2020

Creating systematic processes for longitudinal integration of datasets across the lifespan representing multiple levels of exposure from physiological to sociologic.

**Webinar 3**  
Aug 20, 2020

Utilizing data science resources to prepare and package integrated datasets to make them accessible for researchers to generate and test new hypotheses.

**Webinar 4**  
Sept 17, 2020

Developing and validating ways to model high-dimensional data.

**Webinar 5**  
Oct 15, 2020

Promoting and applying existing methods that fit a methodological framework.

**Webinar 6**  
Nov 19, 2020

Developing analytical methods that can capture the multiple dimensions of time (timing, dose, and duration).

**Lifespan  
Enterprise  
Committee**
