

Interact Club Global H2O Project

Dear SCCS Families,

Global H2O Project

The Interact Club is raising money to provide people in Africa with clean drinking water. Money is being raised so that we are able to purchase a well that will be built in Africa to provide this clean drinking water. We have done this in past years and have been able to provide 3 wells!! Let's continue to bless this nation with clean water to drink!

In Preschool and Grammar School, students will receive a Global H2O water drop for every dollar they bring in. This allows the younger students to contribute to the project and their name goes on these water drops which are displayed in the MPR or in their classroom. This is the Interact Club's effort to get the lower grades involved in helping raise money for the wells in Africa.

On Friday, March 23rd the Logic and Rhetoric grades will be having a One Day Donation Challenge where whatever the Upper School students bring in that day, we will be asking the Pinehurst Rotary to match the amount given. Points will also be earned towards the students houses they belong to.

At the end of March and into April, Logic and Rhetoric students will be conducting a bake sale to raise money for the H2O project. More details to be announced.

Monies for the H2O Project will continue to be raised through April 20th, at which time a check will be given to the organization at a special Interact meeting. Global H2O reps will be at the Interact meeting that day to do a presentation as well.

If you have any questions, feel free to email and I would be happy to answer them.

Thanks for supporting this cause!

Chase Gyles

Interact Club President
