PUT YOUR DATA TO WORK FOR YOU!

# ASSESSING TO INFORM

Through hands-on experiences, learn key guidelines and tips for interpreting data and viewing reports at the student, classroom, school, district, and national levels. Learn how to really understand and apply the data to guide instruction and intervention, plan student groupings, etc. See how to use data to facilitate improved educational outcomes for students.

## Learning objectives

- Reflect on the purpose of benchmark screening and progress monitoring, as well as the key principles of data analysis and utilization within your school system
- Access key group benchmark reports and distinguish what reports can predict future outcomes and/or how each can drive timely, standards based instructional choices
- Practice using specific benchmark data for program evaluation, as well as individual student support and instruction development

**MULTIPLE ASSESSMENTS | MULTIPLE EXPERTS | NO COST TO YOU!**

*Participants must bring their most current (winter) benchmark assessment reports to use and analyze during these sessions. Also, please be sure to have your login information available to access your data in real time.*
