Name	Description	Size	Price	QtyIn	QtyOut	QtySold
Actinidia tetramera var. maloides	A vine whose name has Heronswood roots, described by our garden plant (in Sweden), one of the most acceptable Kiwis with linear black green foliage dipped in white and lovely pink flowers in mid spring. This will not form fruit without a partner, but it would (probably) not be edible	d4	$15.00	x r	3	-3
Anemone keiskeiana	A truly charming, slowly spreading Anemone from the mountains of the Central Alps of Honshu in Japan, forms diminuative stems to 2.5" while carrying relatively large white flowers in mid-spring. For shade or partial shade in any evenly moist soils. This forms colonies but not annoyingly.	d2	$8.00	x r	4	-4
Anemone nemorosa 'Vestal'	One of the best of spring ephemerals, with pristine nodding cups of double white on vigorous mounds in shade to sun in any draining soil. Easy, adaptable, charming.	d4	$12.00	x r	3	-3
Anemonella thalictroides 'Cameo'	From the enchanting N. American woodland ephemeral comes this exquisite double flowered form with an extremely long lasting display of charming pink 'roses' held on delicate, wiry stems to 6" above low mounds of Thalictrum-like foliage. Decidedly tough and long lived, one	d2	$15.00	x r	6	-6
Anemonella thalictroides 'Double Green'	A curiously beautiful selection of our native Anemonella with fully double green buttons in very early spring, surprisingly more available in Japan than its own country. Light shade in humus rich draining soils.	d2	$25.00	x r	3	-3
Arisaema sikokianum var. serratum DJHH 16042	The continental form of this well known Japanese species, from wild-collected seed in Hubei Province in 2016. Purple-black spathes and a contrasting nobby-white spathe formed on 18" stems; foliage more deeply serrated than its Japanese counterpart. Cool, humus rich soils	d1	$12.00	x r	6	-6
Banksia integrifolia	We delight in this tall evergreen shrub/small tree from Tasmania that produces erect cone-like clusters of nectar rich yellow flowers throughout autumn and winter, adored by our hummingbirds. The sheer quantity of flowers produced is staggering. (They make a fine cut stem for the table	d4	$22.50	x r	3	-3
Beesia deltophylla DJHC 98447	Hinkley introduction into commerce from Emei Shan, Sichuan, evergreen clumping perennial with purple tinged new growth, white flowers, NO direct sun. Refined.	d2	$8.00	x r	6	-6
Begonia aff. palmata DJHM 13008	An extremely handsome species collected from 9,000' on the slopes of Phonganrazi during my 2013 trip to northern Myanmar. The robust clumps of handsomely marbled leaves of this species, relatively spare in numbers, made for a satisfying day for one smitten by hardy and	d4	$15.00	x r	3	-3
Begonia baviensis DJHV 13034	One of the most startling of the Begonias I have collected in Vietnam, and successfully cultivated outside for numerous years, with bristly red stems, hairy leaves and large white flowers. Best cultivated in partial shade and provided some overstory protection, in cool humusy soils.	d4	$18.00	x r	3	-3
Begonia sp. DJHAP 18072	Special, yes from NE India high elevation this possesses extraordinarily handsome deeply cut foliage marked in silver and purple, stunning yellow flowers produced in mid to late summer. This has yet to be tested outside, keep in a container until you get a green light from our trials.	d4	$30.00	x r	3	-3
Begonia taliensis	Eric Hammond's original 1997collection for Heronswood, a true gem of the genus for foliage, with heavily mottled palmate 'spiny' foliage and soft pink fading to white flowers in mid-summer. Needs winter protection to survive Puget Sound winters (wood shavings over the crown) but	d4	$15.00	x r	3	-3
Bergenia ciliata 'Dixter Form'	One of the most astounding Bergenias to be grown, gifted to us by the late Christopher Lloyd and since passed about at 'Dixter'. Fully deciduous, the seductive felted leaves will astound in texture and proportion. Full sun or light shade. The flowers in spring, pink, are	gal	$35.00	x r	4	-4
Cardamine trifolia	An indispensable evergreen ground cover forming low, slowly spreading, weed smothering mats of dark green foliage and clean white flowers in late winter rising to 5". Self cleansing. Partial shade in evenly moist, draining soil. A Top Ten.	d2	$8.00	x r	3	-3
Chiastophyllum oppositifolium 'Jim's Pride'	This prideful thing made it back with Robert and I from a shopping spree in England decades ago and still delights in the woodland, forming nice colonies of low rosettes of fleshy foliage, each leaf cleverly margined with white, and pretty panicles of yellow flowers to 10" that gracefully	d2	$12.00	x r	3	-3
Cotula lineariloba	Cute as a button, low silvery mounds of finely textured foliage provide a launching pad of yellow buttons on wiry 4" -5" stems. Needing a well drained location in full sun to succeed, best as a trough or container plant OR in a rock garden with sharp gravelly soils.	d2	$10.00	x r	3	-3
Cypripedium formosanum	One of the best woodland perennials we can grow in the PNW, and one of the easiest of the terrestrail orchids. Ladyslippers of soft pink appear in late spring amidst handsome leaves. Humusy, draining soils in light shade; even water. Slit pot four sides and plant directly.	d4	$35.00	x r	3	-3
Disporum cantoniense ex DJHH 14185	Seedlings from my original collection of this species representing a good form, producing lusty bambooaceous 3.5' columns of with dark green foliage and terminal clusters of large, nodding burgundy bells. In light shade with humusy, cool soils.	d1	$12.00	x r	3	-3
Disporum flavens	A lovely and distinctive species of Disporum from Korea with robust clumps of bright green foliage tipped by large yellow flowers in mid-spring; one of the showiest of all Disporums though infrequently seen in gardens of the PNW. Light shade in any draining, evenly moist	d4	$15.00	x r	3	-3
Disporum longistyum 'Night Heron'	Lustrous, dark chocolate-purple stems gracefully rise from the soil in spring with shiny dusky-purple leaves on gently arching side shoots, a bamboo-like effect. Small, creamy chartreuse flowers are followed by showy, purple black berries in summer against dark green, purple-tinged	d4	$15.00	x r	3	-3
Disporum longistyum Tuahong Flower Mtn.	2015. A distinctive form of this evergreen species forming robust columns of glossy, evergreen foliage and clusters of pretty yellow flowers born terminally in mid-spring, followed by crops of glossy black fruit.	d4	$18.00	x r	3	-3
Disporum smilacinum 'Flore Pleno'	Whether or not the cultivar name is valid, this Japanese selection of a stoloniferous species reeks with charm, forming dense spreading mounds of squat deciduous foliage capped for a long period in late spring by fully double white flowers.	d4	$18.00	x r	3	-3
Epimedium acuminatum DJHS 8129	One of the gems of the evergreen Chinese species with handsomely marbled foliage displays tall sprays of purple lavender flowers above in mid spring. Collected by Hinkley, et al, in 1996 on the slopes of Emei Shan in Sichuan Province where it is gathered by locals, dried and sold	d4	$15.00	x r	3	-3
Epimedium grandiflorum ssp. koreanum HC 970522	HC 970522 A Japanese collection from Northern Honshu with enormous creamy yellow flowers.	d4	$18.00	x r	3	-3

Name	Description	Size	Price	QtyIn	QtyOut	QtySold
Epimedium ‘Royal Dress’	We think an appropriate name for a good plant, forming evergreen mounds of glossy foliage, emerging royally regal in spring, capped by large flowers of ermine slash diamond. It all seems like something we cannot afford. Partial shade in cool draining soils.	d4	$18.00	x r	3	-3
Fuchsia ‘Golden Gate’	Too infrequently seen in the trade, a robust and hardy selection with foliage possessing a deeper mustard yellow veined in red, more intense than 'Genii Aurea', and nonstop floral performance of moderately sized bicolor purple/red flowers ithroughout summer, for bright shade or full	d4	$15.00	x r	3	-3
Iris cristata ‘Dash it All’	A relatively recent introduction with dark blue flowers high lit by bright white falls on 5” stems above spreading mats of broad, horizontally held foliage, for shade or bright shade in humus rich, evenly moist soils.	s4	$12.00	x r	3	-3
Kniphofia thompsonii ssp. thompsonii	One of the best Kniphofias, this is aparticularly strong grower from Kelly and Sue at Far Reaches, forming slightly spreading mounds of grass-like foliage from which emerge narrow spikes of bright orange, distinctively nodding flowers to 4' or more, over a very long period in summer.	d4	$15.00	x r	3	-3
Leptospermum lanigerum	**[purple leaf form]** This upright, very small textured narrow selection of the Tea Tree is utterly sensational with tones of deep red foliage that emerges very dark	d2	$15.00	x r	3	-3
Libertia ‘Nelson Dwarf‘	An exceptionally sweet evergreen mound of linear foliage to 10” above which are produced sprays of white flowers in late spring through early summer. Awesome in dry shade if provided moisture for establishment, but better in light shade and even moisture. From Far Reaches through	d4	$15.00	x r	4	-4
Luzuriaga radicans	A too infrequently encountered evergreen creeper, scrambler, climber from S. Chile, presenting pretty star shaped white flowers in mid summer resulting in red berries. A denizen of deep shade in cool moist environments, it appreciates the same here though seemingly pliable in	d4	$15.00	x r	3	-3
Lysimachia paridiformis var. stenophylla DJHC 704	**DJHC 704** A clumper with handsome mounds of bronzed green evergreen foliage to 10” in height, and dense clusters of golden yellow flowers held atop each leaf, for full sun, in any well drained soil. Original ollection of this rare	d4	$15.00	x r	3	-3
Maianthemum henryi DJHC 96321	Though those not appreciating the more subtle and tasteful things of life will probably never 'get' this plant, I think it one of the most refined of the Chinese Maianthemum with lovely deeply veined leaves and terminal racemes of green, intoxicatingly fragrant flowers resulting in red fruit.	d1	$12.00	x r	6	-6
Meconopsis betonicifolia	One of more acceptable of the blue Himalayan Poppies, from the eastern Himalayas and perhaps the easiest to blossom for those unfamiliar with the cultivation of species. It is advised to NOT allow this species to blossom during its first year however our gallon plants should	d4	$12.00	x r	6	-6
Meconopsis betonicifolia	One of more acceptable of the blue Himalayan Poppies, from the eastern Himalayas and perhaps the easiest to blossom for those unfamiliar with the cultivation of species. It is advised to NOT allow this species to blossom during its first year however our gallon plants should	gal	$18.00	x r	2	-2
Olearia avicenniaefolia	To liven the summer landscape in flower and fragrance, and to add good foliage to the year-round garden, nothing compares to the so-called 'Daisy Shrubs' of New Zealand. Particularly good, with more finely textured gray-green foliage on a framework to 3.5', smothered in	d4	$15.00	x r	3	-3
Olearia macrodonta	A superb, bold foliaged gray-green-toned shrub from New Zealand forming a dense mound to 4.5', topped by clusters of pretty white 'daisies' in late June. Site in full sun and draining soils; perfectly drought tolerant when fully established.	d4	$15.00	x r	3	-3
Olearia moschata	A hardy refined daisy shrub from New Zealand, with sculptural toothed leaves providing a bicolor effect of white and deep green, and a very satisfying display of white flowers in dense clusters crowding the terminals and laterals in early to mid summer. Full sun draining soil.	d4	$15.00	x r	3	-3
Olearia paniculata	A very lovely and highly textural evergreen shrub from New Zealand in the Daisy Family with uber undulated slightly yellow-green foliage backed in white and clusters of vanilla scented small white flowers in summer, for dry, exposed sites in draining soils. Shared with us by my professor	d4	$18.00	x r	3	-3
Paeonia veitchii	A lovely, durable and long lived species from Sichuan Province, with handsome deeply cut foliage and nodding single cups of soft pink in mid spring. Full sun or very light shade in draining soils.	d4	$12.00	x r	3	-3
Paris polyphylla Heronswood Form	The most acceptable form of any Paris species in cultivation forming large colonies of exquisite flowers in the same floral format of all Paris species. Arising late May or early June, the stems are sceptre like, elegantly unfurling its foliage and flowers, ultimately to 3'. For light	d4	$30.00	x r	3	-3
Paris quadrifolia	The endearing and historically significant Herb Paris, a medieval medicinal relative of the Trillium, native to much of Europe. Slowly spreading colonies of stems with 4, 5 or rarely 6 rounded leaves are capped with charmingly understated greenish flowers, followed by	d4	$15.00	x r	3	-3
Phlomis fruticosa - small leaf form	Charming, drought tolerant evergreen shrub to 3' x 3' with felted gray green foliage and axillary clusters of yellow in spring through early summer. From a diverse genus of which we have taken a particular liking, this is one of the best.	d4	$15.00	x r	3	-3
Pittosporum tenuifolium Windcliff Seedlings	From Pittosporum 'Tasman Ruffles' Narrow upright columns of textural silvery glistening foliage, to 8', one of the hardiest forms of this species, for full sun and draining soils. Variations include more vigorous growth and some have red spots and blotches reminiscent of 'County Park	gal	$22.50	x r	6	-6
Podophyllum delavayi x pleianthum	Exhibiting the expected hybrid vigor, this robust hybrids combines the large peltate foliage of the latter parent and and copper, burnished foliage color from the former. Full bright positions in cool, humus rich foliage. Deep purple/red 'fragrant' flowers are produced beneath the leaves in	d2	$15.00	x r	3	-3
Polygonatum hirtum ‘Heronswood’	Tony Avent, Plant Delights Nursery, recieved this from us originally as P. hirtum. A truly superb Solomon’s Seal, with elegantly nodding stems to 15” carrying glossy green foliage and large pendulous bells of white-tipped-green produced at the axil of each leaf in late spring. Bright	d4	$15.00	x r	3	-3
Polygonatum odoratum ‘Spiral Staircase’	Polygoantum odoratum that Tony Avent and I collected while together in South Korea in 1997, forming dense stems slightly spiraling and very leathery dark green leaves; axillary while flowers in spring as per the species. A distinctive texture!	d4	$25.00	x r	3	-3
Polygonatum odoratum var. pluriflorum 'Variegatum'	Handsome, stable, colorful and carefree foliage along stems to 1.5', slowly spreading colonies and with axillary bells of white/green tinged flowers in early spring. For the woodland, in cool, evenly moist soils, an aristocrat amongst minions of shade. It seldom gets better.	d4	$12.00	x r	3	-3

Name	Description	Size	Price	QtyIn	QtyOut	QtySold
Pteris wallichiana ‘Hualien Giant’	One of my favorites of all ferns encountered in Asia over many years, this forming a branched rachis of frondly foliage atop 4-5' stems above a slowly spreading rhizome, forming impressive but far from irritating colonies over time. Light shade in evenly moist soils.	d4	$18.00	x r	3	-3
Rhodohypoxis baurii ‘Apple Blossom‘	A very pretty, diminutive white-blushed-pink flowering selection from S. Africa, forming mats on tiny crocus-like leaves and a long progression of relatively large star-shaped foliage. Drainage is key, keeping this plant away from copious moisture during the winter months but providing	d1	$8.00	x r	3	-3
Saxifraga epiphylla DJHC 0581	My collection of this species from northern Yunnan, in the Snow Mountains, in 2000, forming hardy clumps of rounded, silver-streaked foliage and striking 1’ panicles of large. white-bracted flowers in early summer. Small plantlets appear at the base of each leaf, i.e. epiphylla.	d1	$10.00	x r	3	-3
Sedum palmeri ex DJHM 94100	My collections of this seldom seen and extremely hardy sedum from Mexico, south of Laredo, during the spring of 1994. The Echeveria-like rosettes forming tidy clumps of rose-blushed blue-green foliage never seems to have a bad day, summer or winter. I have yet to have this	d4	$15.00	x r	3	-3
Thalictrum aff. ichangense DJHS 8132	Collected in NE Sichuan Province in 2008, this has proven to be a remarkable bright shade species. Very Epimediaceous in foliage, i.e. “What Epimedium is that???”, the leaves take on exquiste tones of varnished lacquer in autumn. For a very long period in late spring and	d2	$12.00	x r	6	-6
Trigonotis omeiana DJHC 839	My original collections of this utterly fantastic member of the Forget-Me-Not family, forming stoloniferous mats of oval foliage cleverly overlaid and etched in silver, and branched cymes of pretty blue (understated but as I said, pretty) flowers in mid to late summer. A	d2	$15.00	x r	3	-3
Triosteum pinnatifidum	Long lived, durable and, well, fruity. This herbacous perennial for shade possesses deeply lobed leaves appearing much like a Hydrangea quercifolia, while rather quite terminal flowers in mid summer result in large, showy white berries throughout late summer and early autumn.	d4	$12.00	x r	3	-3
