

5" SQUARE PERMAPOST® SLEEVE – FEATURES & BENEFITS

- The square coextruded PermaPost® post sleeve is manufactured from low-maintenance cellular PVC.
- Weatherproof, rot and insect proof.
- Installs using common carpentry tools.
- PermaPost® post sleeve has a coextruded PVC capstock.
 - Capstock is highly UV-resistant and eliminates the need for an applied coating to combat fading and yellowing caused by intense UV exposure.
 - Coextruded capstock also eliminates the eventual chalking that occurs with an applied coating.
- Coextruded PermaPost® post sleeve may be painted, but painting is not required.
- Coextruded PermaPost® post sleeve is sized internally so it will now slide over a standard 4x4 treated post.
- Coextruded PermaPost® post sleeve is white in color and matches the color and finish of the PermaRail Plus® rail system.
- Coextruded PermaPost® post sleeve is compatible with Porch-Loc® anti-uplift system
- Compatible with PermaPost® injection molded skirt.
- No change to SKUs
- Load Bearing Capabilities remain the same – 5,000lbs.
