CONTRACTORS Pricing structure

for recycle, refurbishment and processing of solar PV panels.

Recycle PV Solar, LLC (RPVS) is a company that is in the business of responsibly processing solar panels when solar panels come to the stage of needing to be either refurbished, recycled or processed. Our mission is to keep solar PV materials out of landfills and to reuse all components that are salvageable.

A Contractor is a business or individual that is licensed and insured to handle the necessary steps to remove solar panels from installations and make them ready for shipping.

Solar PV Panels we currently process:

Standard Solar Panel made of glass with aluminum frame,
monocrystalline or polycrystalline solar panels (up to 65 lbs)

The balance of the below solar panels are NOT considered *standard*.

Please inquire as to acceptability and pricing.

- a. Frameless, glass solar panels, monocrystalline or polycrystalline
- b. Thin film technology on glass
- c. Thin film technologies encapsulated in plastics
- d. Solar shingles and miscellaneous other technologies

Recycle PV Solar, LLC
