About the Annual Conference
This year’s conference will focus on strengthening the land-culture connection. Together over the next three days we’ll look at how a handful of currently pressing topics are playing out in the landscape, and then provide the space to have conversations that work through the tensions — and explore the opportunities — that each of our diverse collaborators represent.

What we’re doing in Polson
• Exchanging new information and ideas regarding culture, community and conservation
• Connecting people and organizations working on similar issues within our landscape
• Fostering a sense of regional identity and stewardship for the Crown
• Exploring a hand-full of specific, relevant, and currently challenging issues in-depth
