

## **ACC St. Louis Fur Babies!**

- Owner: Danielle Langeneckert
- What are your pets' name? Kimchi (white, 12), Magju (brown, 6), Yeoja (grey, 2)
- How did you get your pets' names?  
We welcomed our first furbaby, Sagwa (who passed in 2020), when my husband and I taught English in South Korea over a decade ago. His name was already given to him, and meant "apple" in Korean. He had a very strong Napoleon complex at only 4.5 pounds, so we kept with small pups when we wanted to grow our fur family. We also kept with the Korean naming theme - Kimchi is a fermented spicy cabbage, Magju means "beer," and Yeoja means "lady."
- What is the funniest/most memorable thing that your pet has done?  
Too many to count! They really love exploring other animals on walks - especially turtles and frogs. They also love to tangle up their leashes on walks, and are always down for a ride in the cart at Home Depot. They have an affinity for unusual treats - while they enjoy a good bacon snack, they also really love tomatoes and lettuce. Each has their own personality, but they definitely are a pack!
- What is the best thing about your pet?  
They are the cuddliest, most loving things on the planet, and all three easily fit in your arms at once. They also are the best coworkers - you never have a dull moment when working from home these days! I refer to them as my furbabies because they are definitely spoiled like children. We even built them a three tier doggy condo so they each have their own space to chill when they're not on the couch or in my office.
