

Acceptable Microchips

Only a 15-digit read-only ISO compliant 11784 / 11785 microchip implanted in the nuchal ligament on the left side of the horse's neck is accepted under USEF rules.

Competition Year 2018

Horses that are not microchipped will not be eligible for Federation and/or USHJA programs or awards. This is meant to be a transitional year for microchip requirements.

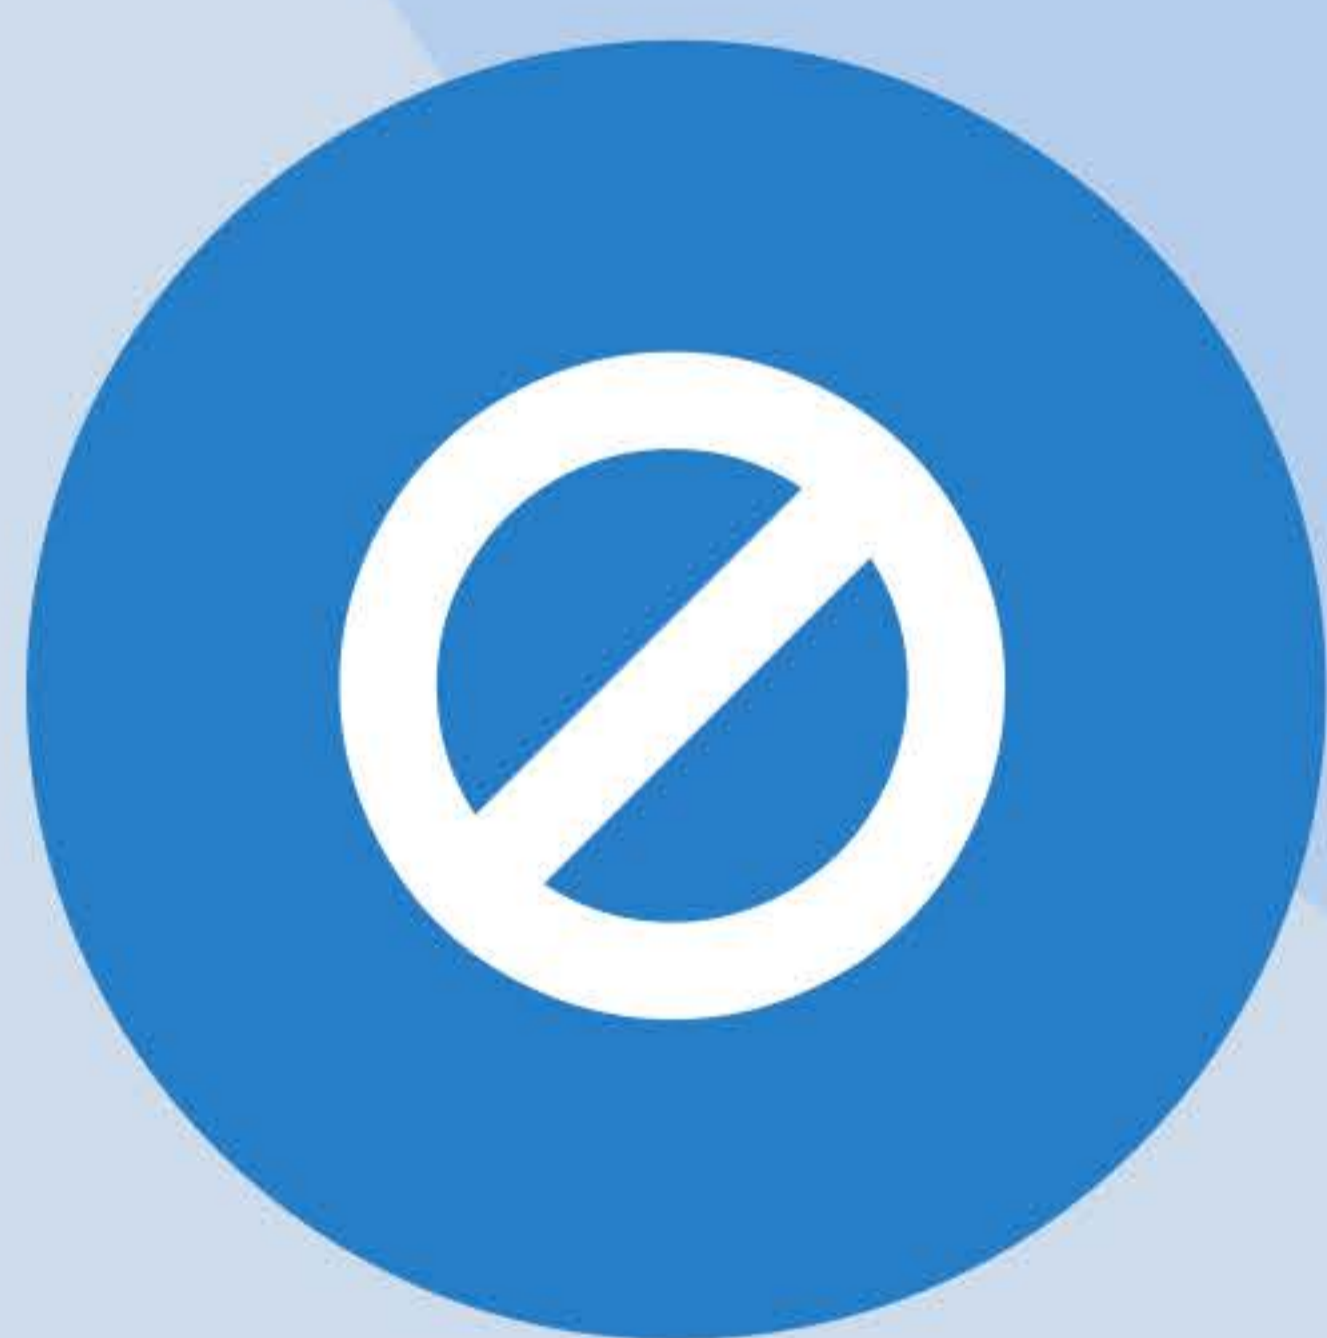

Competition Year 2019

Horses that are competing in classes which require USHJA registration which are not microchipped will be ineligible to compete in Federation licensed competitions.

Everything You Need To Know

About USEF Microchipping Rules for Hunter/Jumper/Hunter Jumper Equitation

9-0-0 Microchips

Microchips beginning with 9-0-0 are not eligible under USEF rules, even though they are accepted by FEI. 9-0-0 is a manufacturer code that was given to multiple manufacturers, allowing for possibility for duplicates. Other microchips with manufacturer prefixes beginning with 9 are acceptable.

Pre-existing Microchips

If a horse already has an acceptable microchip, the number should be reported to USEF. If it is not acceptable, a compliant chip should be inserted and both numbers should be reported to USEF.

Reporting Microchip Numbers

Microchip number(s) can be reported on a horse's record in a member's "My USEF My Way" account, on a Microchip Reporting Form by email to horseservices@usef.org or fax to (859)231-6662, or completing the microchip field on a USEF Horse Recording ID Application.
