LEGO
BUILD COMPETITION

As part of Construction Career Day 2025, the Builders Exchange of Rochester and Livingston Associates are putting your building skills to a test! Join us for our first ever Lego build competition. Compete in teams of three, Project Manager (directs), Superintendent (relays information), & Foreman (builds), against other student teams as your group works together like a real-life construction project! Sign up today to show off your teamwork and construction skills!

What to Expect

- Each team consists of (3) Players: Project Manager, a Superintendent, and a Foreman.
- Each team will be building the same project. The first team to build the building correctly wins. If no teams complete this project correctly in time, the team with the most correct pieces wins.
- Once in their respective teams, ALL Project Managers will meet with the Owner Representative away from the Superintendents and Foreman for additional instruction.
- Students will have 45 minutes to complete this project.
