About 105 Estimating & Bidding 1

The 105 Estimating and Bidding online course features hands-on estimating and quantity take off activities associated with General Conditions, Site Work, Concrete and Form work, and Masonry Estimating. Taking this construction estimator training online is a convenient and flexible way to fit this course into your busy schedule!

This class is part of **the Certificate in Construction Estimating and Certificate in Construction Practices programs**. Earning course's 1 & 2 construction certification programs will boost your professional work resume and uplevel your expertise!

In each module there are discussions (10 points), a quiz (10 points), and homework (10 points). Course modules will be made available to students on Sunday of each week. Class work must be completed before the following Monday. Students will not be able to work ahead of the class although reading assignments will be made available in advance and posted in the Critical Course Information.
