

AGC OF INDIANA SAFETY FORUM

Join AGC of Indiana for a safety educational forum on September 26th at the Indiana Historical Society. The forum will explore Job Site Safety Technology with a series of hands-on learning stations designed to offer members a personal experience. Join AGC of Indiana and fellow safety leaders as we explore cutting edge safety technology and how it can be applied on your projects. Our safety forum will open with a networking luncheon.

FORUM SPEAKERS:

The AGC of Indiana Job Site Safety Technology Symposium will feature unique presentations from the following industry partners:

DronEye Imaging – Take an inside look at how drone technology can make projects safer. Learn more about regulations for flying drones.

MindForge and Purdue University - Explore Virtual Reality technology and its impact on safety training. Hands-on learning station will be available.

Construction Robotics – Learn more about how the MULE Material Unit Lift Enhancer can provide many applications for production and cutting down sprains and strains, as well as wear and tear.

CEU's will be available for attendees.
