

## Purpose: Understand how to get a patient gap list for Quality measures

### What are Quality measure reports?

Epic Healthy planet has two kinds of reports

1. Patient Deficiency Metric reports – gives all patients that are **not meeting** numerator criteria for a given metric
2. Patient meeting Metric reports – gives all patients that are **meeting** numerator criteria for a given metric

### How do I get a gap list?

**Patient Deficiency Metric reports** give you a consolidated list of patients who have a gap for a particular metric

### Where in EPIC?

There are two different paths you can take to get to the gap reports

1. Patient Deficiency Metric reports – gives all patients that are **not meeting** numerator criteria for a given metric
  - Navigate to your Population health Dashboard
  - Click on the  next to the metric you want to run report for
  - In the pop up window, hover over “Not Done” report and click on the  icon to the right

- In the next screen, expand Patient base, enter provider's name in “Target” box and click “Run”

# One Point Lesson – Quality measure reports - Provider

## 2. Reporting work bench:

- a. Click on EPIC button and locate “Reports” in the drop down menu
- b. Hover over “Reports” and select “My reports” from the options
- c. In the next screen, click on “Library” tab
- d. Enter key words in the search box (example: Breast cancer screening)
- e. From the results select the appropriate report that starts with “Wellness” and ends with (Provider)
- f. Click on the “Edit” button to the right
- g. In the next screen expand “Target” section
- h. Enter “Provider’s name” in the “Target” box
- i. Click “Run” at the bottom of the screen
